

## The Hampshire Science Geekathon (Big Ideas in little sessions)

The Hampshire Science Geekathon is an opportunity to discuss some of the fantastic ideas and strategies about teaching and leading science that are being employed across Hampshire from the teachers that are developing them.

The afternoon will begin with a keynote address from Professor Becky Parker (MBE), Director, Institute for Research in Schools | Visiting Professor, School of Physics and Astronomy at Queen Mary College, University of London.

The subject of her talk will be: Researchers in Schools – helping school students do real science, raising STEM aspirations and enriching teachers' careers

The remainder of the afternoon will allow you to choose three thirty-minute workshops from a series of topics including: Marking strategies that are more effective and less time consuming, engaging parents and primary children through Christmas lectures, improving students multi step calculations, using pictures to summarise learning and many more.

There are still some presentation slots available, if you would like to share ideas from your school in a thirty-minute workshop, please contact Richard Aplin at the address below.

- Date/time:** 21 June 2019  
12.45 pm – 4.30 pm
